Zephyr - Life Sciences Research Solutions
Caliper Life Sciences Zephyr Automated Liquid Handler: The Zephyr Molecular Biology Workstation is the perfect complement for today's molecular biology laboratories. Whether isolating total RNA, purifying PCR fragments, setting up reactions, or normalizing DNA samples, the Zephyr Molecular Biology Workstation provides a straight forward and simplified approach, which reduces errors and ensures reproducibility.

Caliper Life Sciences Zephyr Automated Liquid Handler
Caliper Life Sciences Zephyr Compact Zephyr is Caliper's newest edition to our comprehensive line of precision liquid handling instruments. Zephyr was born from a market demand for a compact, cost-effective, multi-channel liquid handling system.

Zephyr ® G3 NGS Workstation. The Zephyr ® G3 NGS workstation is a benchtop liquid handler designed to automate the construction of 48 to 96 next generation sequencing (NGS) libraries per day. The simplified user-interface and integrated hardware maximize laboratory productivity while reducing variability resulting from manual pipetting.

Zephyr ® G3 NGS Workstation
The Zephyr ® G3 SPE workstation is a simple and efficient liquid handler that automates the critical steps required in high-throughput solid phase extraction (SPE). It is designed to meet the needs of clinical research, forensic, pharmaceutical, and biotech laboratories. Designed to process 96 samples simultaneously with its 96 channel high volume head, the Zephyr G3 SPE workstation can ...

Newborn screening programs are life saving for babies who are born with abnormalities, however they are largely not funded... especially in resource limited settings. In sub-Saharan African, NBS programs virtually don't exist and yet diseases like Sickle cell and other genetical, hormonal, and metabolic abnormalities are rampant.
