The respiratory system is the network of organs and tissues that help you breathe. It includes your airways, lungs, and blood vessels. The muscles that power your lungs are also part of the respiratory system. These parts work together to move oxygen throughout the body and clean out waste gases like carbon dioxide.

The trachea is roughly 4 to 5 inches long and 1 inch in diameter. It starts just under the larynx (voice box) and runs down the center of the chest behind the sternum (breast bone) and in front of the esophagus. 1. The trachea is connected to the larynx via a ring of cartilage known as the cricoid cartilage.
